oslo contemporary
music festival

- 1 Sentralen**
Handout of the headphones and maps. The walk is free but you will be asked to leave a document. Test your headphone: listen to the various screens and electronic keylocks in the entrance area. Leave the building
- 2 Streetcorner**
Stop and observe the various signals from the tram lines. Try different positions. Cross the street.
- 3 Security gates**
3a. Go close to the entrance of the shop "Filippa K". Attention: the sound is very loud, do not come too near. 3b. Go on and compare with the security gate at the entrance of "acne studios". 3c. Cross the street and listen to "Zara"
- 4 Stortinget T-Bane**
Go down to the metro station. Next to the stairs you find to your right two large advertisement screens. Listen very close and move your head. Explore more light screens and electronic displays in the area (not all of them sound). Then take the escalator and listen as close as possible to the small light screens in the wall while going down. They all sound different.
- 5 Metro hall**
Discover the various sounds of the ticket machines, led lights etc. then take the escalator up on the opposite side and exit at "Lille Grensen"
- 6 Lille Grensen**
A sharp rhythmic ticking signal welcomes you when you exit the station. Go along the street and explore more security gates such as the one of "power". Turn around the corner to your left until you reach the sport outlet.
- 7 Sport Outlet**
Go into the entrance area and move under the two white boxes hanging from the ceiling. Create your own patterns.
- 8 ATM Machines**
Cross the street and go to the two ATM machines of the dnb bank. Listen close to the screens. Enjoy the variety of signals.
- 9 Parliament**
Cross the park and observe the various antenna signals. Take off your headphone, switch it off and get your ears a short rest. If you feel tired you can bring your headphone back now. Otherwise go down Rosenkrantz gata until you reach Rolf Strangers plass. Put on your headphone again. Now you can explore the exciting harbour atmosphere.

- 10 Self driving bus**
Go to the stop of the red self driving bus and have a trip with Mads or Oda. Enjoy the musical harmonies and sudden breaks, it's a special experience.
- 11 Harbour (Radhus brygge?)**
Go along the harbour towards Aker Brygge. Enjoy the view and the various signals.
- 12 Akerbrygge**
Listen to the signals between the ferry departure signs B,C and D, then continue to walk along Stranden. Turn right at Riggersgata
- 13 Underground parking**
Enter the parking house. The entrance is just before the Decaux light screen in the passage to your left. Take the elevator down to level C_D. When you get out turn left and enter the parking "C". Go to the right and stop at the column with the grey "router"(???) in front of the blue door. Listen closely. Great rhythm. Explore the parkhouse, but be careful. Take up the same elevator up and continue to walk down Riggersgata.
- 14 Bryggetorget**
Enter the square and approach the six big antennas above the metal Parking pavillon. Listen in different places to the strong signals. Stroll along Holmers gata and go to the tram station(name ???)
- 15 Tram ride**
Take the tram Nr. 12 at Akerbrygge station (?) for two stops and relax while listening the electromagnetic melodies. Exit at Ovre Slottsgatan. Please switch off your headphone and bring it back immediately to Sentralen.

Special recommendation Train station. Take a tram to central station. Go up and down all tracks from 1 to 11, go as close as possible to the neon lights and listen to the beautiful electromagnetic variations.
